

Statement of Achievement

PCAP: Programming Essentials in Python

The graduate of the PCAP: Programming Essentials in Python course, administered by the undersigned instructor, and provided by Cisco Networking Academy[®] in collaboration with OpenEDG Python Institute:

- · knows the universal concepts of computer programming, including variables, data structures, algorithms, control flow, functions, and exceptions;
- · can proficiently use the developer tools, the runtime environment, and the syntax and semantics of the Python language;
- can use fundamental programming techniques, best practices, customs, and vocabulary, including the most common standard library functions in Python 3;
- can write Python programs using standard language infrastructure, and knows the means by which to resolve typical implementation problems;
- · knows how to work with modules and packages, process text and binary files, and use generators, iterators, and closures;
- · understands the fundamentals of object-oriented programming (OOP) and the way they are adopted in Python.
